HALIMA MANSURI

Software Engineer

Ahmedabad, IN | 9016566733 | mansurihalima3@gmail.com | LinkedIn | GitHub | Portfolio

Full-Stack Developer with hands-on experience designing, building, and shipping secure, scalable eCommerce systems end-to-end — from Magento theme and module development to REST API design, payment gateway integrations, real-time features, and production deployment. Comfortable owning a feature from architecture and data modeling through implementation, testing, and deployment, with working knowledge of applying Generative AI (LLMs, RAG) to practical engineering problems. Focused on writing clean, maintainable code and solving real product problems.

SKILLS

Programming Languages: Python, Php, JavaScript. • **Backend:** Flask, Node.js, Express.js, REST APIs, OOPs, JWT, Flask-Bcrypt, CORS, OTP verification. • **Frontend:** React.js, Html, css. • **Database:** MySQL, SQlite, SQLAlchemy, MongoDB • **Data Science & Analysis:** NumPy, Pandas, Data Analysis, Data Visualization. • **Version Control & Tools:** Git, GitHub, Postman. • **Real-Time Communication:** SocketIO, WebSockets, SendGrid, Twilio • **eCommerce & Platforms:** Magento Development, Theme and Module Customisation & Integration. • **Cloud & DevOps:** AWS (EC2, S3), Render, Docker, Linux, CI/CD (GitHub Actions). • **Architecture & Practices:** Clean Architecture, Domain Driven Design, Application Insights. • **AI & ML:** LLM, GenAI, RAG, MCP.

PROFESSIONAL EXPERIENCE

Software Engineer *26/08/2025 - 15/04/2026*

Peerbits Solutions Pvt. Ltd, Ahmedabad, IN

- Built and maintained a full production **Magento 2** leather-goods eCommerce store (bags, wallets, briefcases, accessories) end-to-end from catalog and category structuring through checkout integrating **PayPal, Razorpay, GPay**, and card payment gateways with secure transaction handling across a live catalog of 200+ SKUs.
- Customized Magento themes and modules to match brand and business requirements, and engineered order, shipping, and payment workflows covering multi-carrier shipping rules, tax calculation, and order-state transitions.
- Designed, built, and published two custom **Magento 2** extensions on the **Adobe Commerce Marketplace** — a Product Finder module for smarter catalog search and filtering, and a Global Price & Stock Updater that cut manual price-update time by an estimated **60%** — following Magento coding standards and marketplace technical review requirements.

Full Stack Developer *01/07/2023 - 31/07/2025*

Aminsoftech, Ahmedabad, IN

- Designed and built a full-stack eCommerce platform from the ground up — a **Flask/Python REST** backend with a **React.js** frontend — covering cart, checkout, and a CRM layer for managing customer and seller data, backed by **SQLAlchemy** models on a **MySQL** database.
- Integrated **Stripe** payment gateways with a signed webhook system to confirm payments securely and trigger automated seller payout tracking, cutting manual payment-reconciliation effort by an estimated **40%**.
- Architected and documented **REST APIs** following clean, resource-oriented design, with **JWT**-based authentication, input validation, and **CORS** configuration, powering 15+ endpoints consumed by the React frontend, plus product/wishlist/stock-validation logic for the catalog.
- Built real-time buyer-seller chat using **SocketIO**, including message handling and connection-state management, to support live pre-sale and post-sale communication.
- Designed a multi-role (Users, Chefs, Admins) booking workflow with **JWT**-based role authorization across the booking lifecycle, plus **Stripe Connect** split payments, **SendGrid** email notifications, and **Twilio** SMS OTP verification for secure onboarding.
- Deployed and maintained the application in production on **AWS**, handling environment configuration, database migrations, and ongoing bug fixes driven by real user feedback, maintaining an estimated **99% uptime**.

EDUCATION

Master's In Computer Application (MCA) **2023 - 2025**
GLS University, Ahmedabad, IN • GPA: 8.4

Bachelors of Computer Application (BCA) **Jul 2021 - Mar 2023**
Gujarat University, Ahmedabad, IN • GPA: 8.3

CERTIFICATIONS

- Generative AI Applications with Amazon Bedrock — Coursera, authorized by Amazon Web Services (AWS) — May 29, 2026
- Internship Completion Certificate as Machine Learning Intern • Cognifyz Technologies • 20/09/2025
- Web Development Project Certificate • Infolabz IT Services • 2022-2023
