

HALIMA MANSURI

mansurihalima3@gmail.com • 9016566733 • Ahmedabad, IN • [LinkedIn](#) • [GitHub](#) • [Portfolio](#)

Full-Stack Developer skilled in Python, Flask, React.js, and Magento, focused on building secure, scalable eCommerce applications. Experienced in API development, payment gateway integrations, and database-driven features. Seeking to contribute to impactful projects with clean code and practical problem-solving.

Skills

Programming Languages: Python, Php, JavaScript. • Backend: Flask, REST APIs, OOPs, JWT, Flask-Bcrypt, CORS, OTP verification. • Frontend: React.js, Html, css. • Database: MySQL, SQLite, SQLAlchemy • Data Science & Analysis: NumPy, Pandas, Data Analysis, Data Visualization. • Version Control & Tools: Git, GitHub, Postman. • Real-Time Communication: SocketIO, WebSockets, SendGrid, Twilio • eCommerce & Platforms: Magento Development, Theme and Module Customisation & Integration.

Professional Experience

Jr. Magento Developer

26/08/2025 - 15/04/2026

Peerbits Solutions Pvt. Ltd, Ahmedabad, IN

- Built and maintained a Magento leather eCommerce store (bags, wallets, briefcases, accessories). Integrated PayPal, Razorpay, GPay, and card payments.
- Customized Magento themes & modules. Implemented order, shipping, and payment workflows. Published custom Magento 2 extensions on Adobe Commerce Marketplace: Product Finder, Global Price & Stock Updater.

Full Stack Developer

03/12/2024 - 31/07/2025

Aminsofttech, Ahmedabad, IN

- Built full-stack ecommerce application with Cart, Checkout, and Stripe payment gateways and CRM systems using Python, Flask (backend) and React js (frontend).
- Developed REST APIs, integrated webhook system for secure payment confirmation and automated seller payout tracking and MySQL databases, deployed applications. Built real-time chat functionality between buyers and sellers using SocketIO.

Projects

The Bond Board – Full Stack Web Application

[Demo](#) [Github](#)

Built a responsive full-stack app using React, Chakra UI, and Flask to manage and display friends in an interactive dashboard.

- Implemented JWT-based authentication, REST APIs, and secure CRUD operations with SQLAlchemy.
- Deployed on Render with features like dark/light mode, animations, and mobile-friendly design.
- Configured CORS and backend security best practices to ensure safe client-server communication.
- Deployed full-stack application on Render, with version control via GitHub.

To-Do List Web App – Flask Project

[Github](#)

Developed a task management web app using Flask, SQLite, and Jinja2 for dynamic rendering.

- Implemented CRUD functionality (add, update, delete tasks) with frontend using HTML, CSS, and JavaScript.
- Strengthened backend development skills, database handling, and full-stack integration.

E-Commerce Backend System

[Demo](#) [Github](#)

Developed a scalable backend using Flask-RESTful, SQLAlchemy, and MySQL with JWT authentication and order management features.

- Implemented product handling, wishlist, stock validation, and REST APIs following clean architecture practices.
- LINK : Article: Medium (E-Commerce Backend Guide) <https://medium.com/@mansurihalima3/how-i-built-an-e-commerce-backend-with-flask-restful-sqlalchemy-and-mysql-afc82c178bbc>

Underground Water Prediction using Sentinel-1 (ML Project)

[Demo](#)

Developed a machine learning model using Sentinel-1 SAR data to predict groundwater levels with ~0.85 R² accuracy.

- Performed geospatial preprocessing using SNAP, QGIS, and Python (GDAL, Rasterio) with feature engineering on satellite data.
- LINK : Medium-Article : <https://medium.com/@mansurihalima3/underground-water-prediction-using-sentinel-1-data-a-case-study-abc2ec8a0f7e>

Chef in Private - Online Chef Booking Marketplace

[Github](#)

Developed Flask REST API with SQLAlchemy, MySQL, and JWT authentication for multi-role platform (Users, Chefs, Admins) handling complete booking workflow from requests to payments

- Integrated Stripe Connect payments with SendGrid notifications and Twilio SMS for OTP verification, implementing secure split payments, real-time notifications, and comprehensive user management system

Face Recognition with OpenCV

[Github](#)

Built a face detection and matching tool using Python and face-recognition library.

Dragon Real Estates - Price Predictor (ML)

[Github](#)

Built a machine learning model to predict real estate prices using Scikit-Learn.

Movie Recommendation System (ML)

[Github](#)

Content-based recommender using TMDB metadata and cosine similarity.

Stack: Python, Pandas, Scikit-learn.

Education

Master's In Computer Application (MCA)

[2023 - 2025](#)

GLS University, Ahmedabad, IN • GPA: 8.4

Bachelors of Computer Application (BCA)

[Jul 2021 - Mar 2023](#)

Gujarat University, Ahmedabad, IN • GPA: 8.3

Certifications

Internship Completion Certificate as Machine Learning Intern • Cognifyz Technologies • 20/09/2025

Web Development Project Certificate • Infolabz IT Services • 2022-2023

Languages

English (Fluent) • Hindi (Fluent) • Gujarati (Native)
